We will contact the patient within 4 business hours to schedule.

## AI HEART SCAN: PROVIDER INSTRUCTIONS

### 1. Absolute Contraindications

- Pregnancy
- Severe iodine contrast allergy
- Severe renal impairment (eGFR < 30)
- Uncontrolled arrhythmia
- Severe aortic stenosis or hypertrophic cardiomyopathy

### 2. Labs & EKG

- Send most recent EKG & labs (BUN/creatinine). We have an I-STAT machine on-site to analyze creatinine if needed.

### 3. Medications to Hold

- PDE-5 inhibitors (Viagra, Cialis): 72 hrs prior & 48 hrs after
- Stimulants (ADHD, weight loss, energy): 36 hrs prior
- Metformin: 24 hrs prior & 48 hrs after

### 4. Pre-Medication Guidelines (Best Image Quality)

Baseline HR	Recommended Action
> 75 bpm	Metoprolol 75mg x 1 + Corlanor 7.5mg x 2
65-75 bpm	Metoprolol 25mg x 2 + Corlanor 7.5mg x 2
60-64 bpm	Metoprolol 25mg x 2 + Corlanor 7.5mg x 1
< 60 bpm	No meds needed*

**\*If HR is 55-59, consider Metoprolol 25mg x 1 or x 2**

*Goal: HR < 60 bpm and regular rhythm at time of scan. Take Metoprolol 3 hours before, and Corlanor 2 hours before (only if prescribed).*

## AI HEART SCAN: PATIENT INSTRUCTIONS

### Schedule The Scan

- Send referral to (F)727-954-0000 or hello@truescanmri.com
- We will contact the patient within 4 business hours to arrange the scan

### Before The Scan

- Complete intake forms through TrueScan patient portal
- Follow pre-medication guidelines

### Day of Preparation

- Fast for 4 hours. Drink plenty of water up until 1 hour prior
- Avoid caffeine, nicotine, chocolate, and rigorous exercise
- Hold medications listed in provider instructions

### At The Scan

- Please arrive 15 minutes early. HR and BP will be checked
- If your HR is < 60 bpm, you'll be scanned right away. Otherwise, you'll receive oral metoprolol or ivabradine
- Once target HR is achieved, an IV will be placed, EKG stickers attached, and nitroglycerin given to dilate your arteries
- The scan itself takes less than 5 minutes
- Your IV will be removed, vitals checked, and you're free to leave

### After The Scan

- Hold medications listed in provider instructions
- Resume normal activities and drink plenty of water
- Results available within 7 days. You can then schedule a video consultation with a TrueScan physician to review your results

## FULL BODY MRI: PATIENT INSTRUCTIONS

### Schedule The Scan

- Send referral to (F)727-954-0000 or hello@truescanmri.com
- We will contact the patient within 4 business hours to arrange the scan

### Before The Scan

- Complete intake forms through TrueScan patient portal
- A TrueScan physician can prescribe a sedative to your local pharmacy if you anticipate claustrophobia
- If you've ever had an eye injury involving metal, an orbital X-ray may be required

### Day of Preparation

- Fast for 4 hours
- Remove makeup, hair products, hair accessories, eyelashes, hair extensions, piercings, jewelry, and transdermal patches

### At The Scan

- Arrive 15 minutes early
- Change into MRI-safe scrubs in your private suite
- MRI coils will be gently placed on your body and around your head
- The scan takes 60 minutes. You can watch Netflix, Youtube, or TV shows through our entertainment system during the scan.
- You can talk to the technologist anytime through a two-way intercom

### After The Scan

- Resume normal activities
- Results available within 7 days. You can then schedule a video consultation with a TrueScan physician to review your results

### Absolute Contraindications

- Pacemakers, defibrillators, or spinal cord stimulators

*Most implants are MRI-safe. Each patient completes an MRI safety form, and our team handles all verification.*
